Summary

I'm a software professional Python developer with knowledge of NLP,LLMs, & RAG-based applications. Experience in building backend APIs using FastAPI, REST APIs Familiar with tools like Hugging Face, OpenAI, LangChain, & vector databases. Able to work on complete projects from data handling to deploy using Render & Git.

Technologies

Languages: Python

Artificial Intelligence & NLP: NLP, LLMs, RAG, Embeddings & Vector Databases, Prompt Engineering
AI/ML Frameworks & Tools: Hugging Face Transformers, OpenAI API, LangChain, LangSmith, LangGraph
Machine Learning & Data Science: Machine Learning, Data Analysis, Pandas, NumPy,Matplotlib, Seaborn,streamlit
Backend development: FastAPI , OOPs, RESTful API development,
Databases: PostgreSQL, MySQL,SQL
Data & Business Tools: Microsoft Excel, Power BI
Source code management: Git, GitHub, Render (Cloud Deployment)

Experience

DATA SCIENCE TRAINING AT PROFOUND EDUTECH NASHIK **June 2025-Dec 2025**

- Completed a 6-month Data Science training program with hands-on experience on real-world datasets.
- Analyzedand cleaned datasets containing 50,000+ records using Python (Pandas, NumPy) and SQL.,Excel
- Built interactive Power BI dashboards that reduced manual reporting effort by 40%.
- Applied machine learning algorithms to improve prediction accuracy

Project

Movie Recommendation System (ML-Based)

- Built a movie recommendation system using Python and Machine Learning techniques based on similarity scores
- Implemented recommendation logic using precomputed similarity matrix to suggest top 10 similar movies.
- Developed an interactive frontend using Streamlit for user input and dynamic movie display with posters.
- Integrated external API to fetch real-time movie posters for better user experience
- Managed version control using Git & GitHub

SMS Spam Detection System (Machine Learning-NLP-Streamlit)

- Developed an SMS Spam Detection System using Machine Learning and NLP techniques. Used TF-IDF and CountVectorizer for text feature extraction and trained multiple classification algorithms including SVC, Naive Bayes, and Random Forest to select the best-performing model. Achieved 97%+ accuracy in spam classification and built a Streamlit-based frontend for real-time prediction. managed version control using Git & Github.

Multi-User AI Chatbot with RAG (PostgreySQL-langchain-RAG-LLM-FAST-API,streamlit Based System)

- Developed a multi-user AI chatbot system with user information and chat history management using PostgreSQL
- Built a Retrieval-Augmented Generation (RAG) pipeline by processing documents and creating embeddings using Hugging Face models and FAISS vector database
- Implemented backend APIs using FastAPI for user creation, chat handling, and history retrieval
- Integrated LangChain with LLM(Hugging Face API)to generate context-aware responses based on stored knowledge Designed an interactive frontend using Streamlit for real-time chatbot interaction
- Used Git & GitHub for version control

certification

- **Data Science certification-Profound Edutech nashik**

Education

Matoshree College Of Engineering,nashik, BE-AI&DS Nov 2021– July 2025

- CGPA: 6.73/10

K.K Wagh Science,pimpalgoan baswant HSC(class XII) Aug 2020– july 2021

- Percentage: 63.83%

Yogeshwar Vidyalaya School, Davachwadi SSC(class X) Jun 2018– July 2019

Percentage: 72.20%
